

Design and Technology Year 7 Homework

During year 7 your son/ daughter will be studying Art, Graphics, Resistant Materials, Food and Textiles as part of a carousel system. Each week the pupils will have three hours of one of these subjects and every half term the subjects that they are studying will change, so for example they may have Art from September until October and then move to Textiles until Christmas.

For each subject area the pupils will have one extended homework task set and will have approximately three weeks in which to complete it and hand it in to their Art or Technology teacher. We expect the pupils to spend half an hour to one hour each week on the task this can be spread over the three weeks or completed in a block of time whichever your child prefers.

In addition there may be small research tasks set but these would only be 10-15 minute tasks. For example collecting pictures for a project or weighing out ingredients for Food Technology.
