

## Problem Solvers

(This idea is really helpful for answering questions that need 3 or 4 or more points.)

Think of a question or get a past paper question about a topic.

**First** of all write down any important ideas and key words that might be useful.

**Second** draw any diagrams or pictures that could help with your explanation.

**Thirdly**; using the information you have try to order it into a sensible sequence of bullet points.

**Lastly**; using the bullet points as a frame, write a paragraph to answer question.

## Science problem solver

The problem:

---

**Brainwaves** - Important ideas and vocabulary that may be useful

**See** - Diagrams and pictures that may help with an explanation

## Science problem solver

**Think/Sequence** - Organising the best ideas into a sensible order
