19 June 2017

Dear Resident,

Traffic Signals Improvements

City of York Council are undertaking a programme of work to renew and improve traffic signals infrastructure across the city. As part of these works, along with a complete refurbishment and replacement of the traffic signals equipment, some minor changes are proposed to the footways in the vicinity of the crossing on Scarcroft Road near the allotments.

It is expected that construction of this scheme will commence from Monday 3rd July 2017, with works currently expected to last for around two weeks. The hours of working will be 9:30am – 4:00pm, Monday – Friday. The exception to this will be the carriageway resurfacing works which will be undertaken on 18th July between 19:00 and 23:00. Works will be suspended on Friday 14th July 2017 due to the York Race Meeting.

A single lane and footway closure will be in place during construction, with temporary signals to control traffic during working the hours. Once the work is completed on one side of the carriageway, the lane and footway closure will switch to the opposite side.

Some parking is proposed to be suspended to allow for the temporary signals operation and this will be advertised separately. In order to undertake the resurfacing works a full road closure will be in place over night between Scarcroft Hill and Nunthorpe Avenue,

A controlled pedestrian crossing will be provided during construction to allow pedestrians to cross the road safely.

Please find enclosed the latest design drawings showing the proposed layout in addition to the proposed location of the traffic signals equipment.

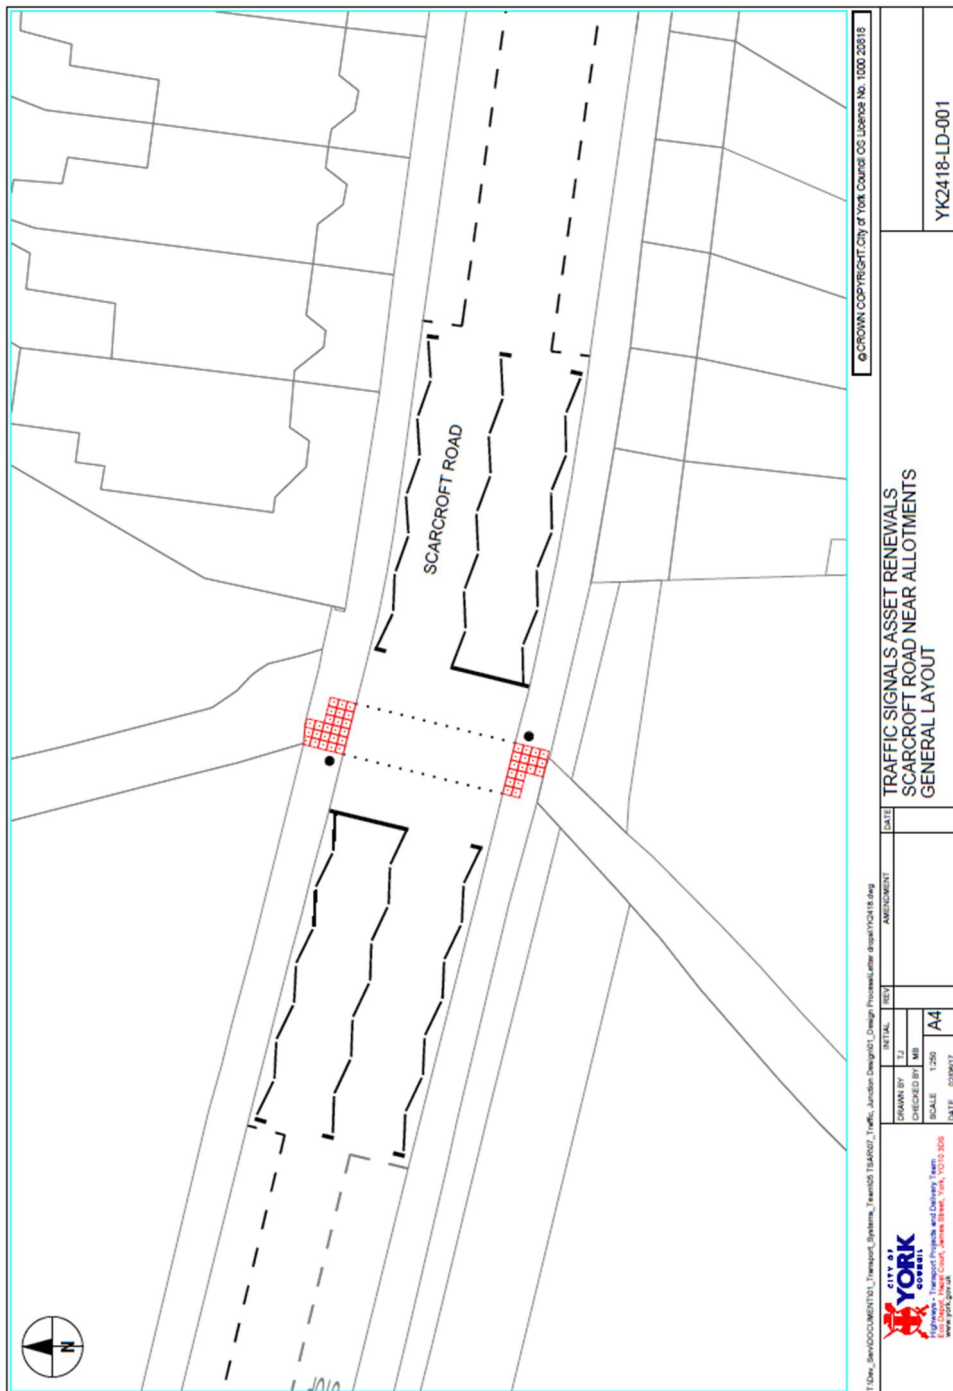

If you have any questions or concerns regarding the introduction of this system, please contact a member of the design team by emailing the project inbox at:
